

# Kalahari Sunrise

SANDSTONE STEAM GALA AND KALAHARI CENTENARY

The first model HD locomotive built for German South-West Africa (now Namibia) and later designated NG5 developed into the NG15. These locomotives were introduced in 1912. This iconic family of 2-ft Narrow Gauge locomotives will be 100-years old next year.

**TO CELEBRATE THIS MILESTONE THE SANDSTONE HERITAGE TRUST WILL BE HOLDING A STEAM GALA BETWEEN 23RD MARCH TO 1ST APRIL 2012.**

Our NG15, No. 17, has been in regular and reliable service for many years now and was at one stage the only working NG15 in the world. This pre-eminent 2-ft Narrow Gauge locomotive will be joined by 20 other important and iconic locomotives, all of which will be in steam, operating different consists over the 8-day event.

This is a serious event for enthusiastic, committed, and knowledgeable 2-ft Narrow Gauge and Heritage fans. The full programme is currently being developed and regular information bulletins will be released.

If you are interested in attending or finding out more about the event please contact us as follows:

**UK Contact Details**
