### **B-wagons prepared for export.**

Over the years the Sandstone Heritage Trust has bid aggressively on scrap tenders involving 2-ft Narrow Gauge wagons. We now have well over 200 wagons on the farm which means we have to continuously build extra storage lines.

Because we are a Preservation centre we are very prudent about maintaining a strong inventory of key items but in order to fund our on-going operations we will, under certain circumstances, export Narrow Gauge wagons.

Our criteria would be that we would want to keep at least 20 of each model before even considering that. The pictures below show B-wagons being restored and prepared for export.
