

Sandstone News 17.09 2012

Bloemfontein carries out repairs on Lawley NG6, No. 106 and Fowler B5 Road locomotives.

Both these locomotives required fairly extensive work to make them current and to make sure they passed a boiler inspection. The Lawley is now complete while the Fowler has just left for Bloemfontein for a complete retube.

These are both popular locomotives and we are making an effort to make sure they are available for the Stars of Sandstone 2013 event.
